

## POLICY

### ENVIRONMENTAL POLICY

Pumps United is committed to environmental sustainability. We strive to balance our economic and operational requirements with social responsibilities whilst minimising the impact of business activities on the environment and surrounding communities. This policy applies to all of Pumps United's employees, contractors and other workers (employees).

To achieve environmental sustainability, we will:

- Meet or exceed relevant environmental legislation;
- Provide a systematic approach to managing the environmental impacts of our activities and maintenance programs;
- Manage environmental risks through risk reduction strategies and contingency planning;
- Promote the efficient use of energy and water, reduce our waste produced and recycle materials where applicable;
- Gain commitment from our personnel and sub-contractors to the process of sustainable development;
- Ensure that we provide technical success through teamwork, flexibility and attention to detail;
- Regularly review our environmental performance and identify and implement opportunities for improvement;
- Continually improve the quality and effectiveness of our management system.

Pumps United are commitment is to deliver completed projects to our clients that:

- Demonstrate leadership in environmental management;
- Meet budget requirements;
- Are completed on or before time.

**Pumps United's Senior Management Team is responsible for the effectiveness of our management systems, encompassing all professional services undertaken for our clients.**
